

## Devin's Story

*"I want to be a pediatrician when I grow up, I love helping kids."*

Devin isn't your typical freshman- she's kind, respectful, and a good listener. She's even on the varsity volleyball team at her high school! We met her and her mom at the Girl's World Expo community event, where we were honored to hold a fun photo booth! Her mom heard about the Girl's World Expo on Facebook and thought it sounded like a good place for Devin to hear that she can do anything she puts her mind to. Devin is blessed to have such a loving and supportive mom. "Since her birth it has just been me and her against the world," she said. A relationship or support from Devin's father never worked out and it's just the two of them -- a sweet team! Devin's mom currently works two jobs to provide for them and is sad she doesn't get to see Devin a lot because of it. Even with two jobs, she sometimes struggles to provide. One thing that makes Devin typical, though, is that, like most 14-year-old girls, she struggles with self image from her smile. "For starters, my front teeth don't come together and it makes things like eating a sandwich with lettuce impossible." We're grateful to have met this sweet little family and we believe Devin is going to go great places in life!! We are thrilled to have have the partnership of Dr. Dan Drye, owner of Prairie Grove Orthodontics, on this case with us!
