

Gayle's Story

Gayle, a single mom of four, took care of her family by providing in-home daycare. "I made sure my kids always went to the dentist." Gayle took excellent care of her own teeth at home, but years of not being able to afford the dentist made small dental needs turn into large ones. One day, Gayle decided it was finally time to get her teeth taken care of. She visited a local dental clinic and was treated very well, but she never went back. The transmission in her car went out, causing unplanned expenses, and she simply could not afford the thousands of dollars on her treatment plan. Three years later, she found ADC and finished her treatment. Gayle's happy spirit radiates from her smile, which she no longer hides behind her hand. You're BEAUTIFUL! Thank you for letting us be a part of your health journey!
