

Tim's Story

"When we are no longer able to change a situation- we are challenged to change ourselves." Viktor E. Frankl

That's exactly what Tim did after nearly 15 years of bad oral health habits and no dental home. When things would get really bad, Tim would cobble together the money and make his way to a clinic to have a very painful tooth removed. Since his teen years, Tim had been drinking Mountain Dew and Coke as well as smoking. Nearly six years after he quit the soda and four years after he quit smoking, Tim upgraded his health and committed to getting routine dental care. Self-employed with an internet-based sales company, Tim was quite the internet peruser and found ADC while searching online for affordable dental treatment. He started his care in our clinic by focusing on some pressing needs, but then moved into periodontal care, understanding that the gums and underlying bone are the foundation for all existing and future treatment needs. Tim has shown an excellent level of investment in and commitment to his health. He is thankful for the help of the Agape grant program. We are thankful to know Tim and his kindness and we are honored to be a small part of his story. We are so proud of him! Thanks for sharing, Tim!
